DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hruska '553 in view of either Lundahl et al or Claes. Hruske discloses the basic apparatus except for the use of an enlarged tub. This results in inefficient shredding. Both Lundahl et al and Claes solve this problem by disclosing similar apparatus including the concept of using enlarged feed means in order to shred more material at a given time i.e. make the apparatus more efficient. In order to render the apparatus more efficient, it would have been obvious for one of ordinary skill in the art to modify Hruska by using enlarged feed means, taught to be desirable by both Lundahl et al and Claes. Note that the use of an adjustable fork lift to deliver material of varying configurations is well known in the mechanical handling arts and of no patentable merit.
